elentek®
One Step Forward

DESIGN AND INNOVATION

In energy production and control

"One step forward" as an inspiration, as a guide. "One step forward" leading to constant innovation, continuous pursuit of the excellence and the most advanced components, into care for details and tailor made solutions and projects.

OUR COMPANY

The solution that arises by analyzing the problem, the experience that supports the analysis, the continuous discussion with the users of the products on a daily basis: these are the foundations on which Elentek was born twenty years ago. Pillars that make the company evolve every day, constantly implementing new technologies to be always **one step forward**. With a totally Made in Italy production and a highly qualified technical office, Elentek is present in the national and international market with expandable, modular and totally customizable electrical panels. The control, management and protection of pump systems are guaranteed.

The certified value of a company

The enhancement of human resources, the quality of the product, the control of production processes: Elentek is ISO 9001 certified to grow every day in a virtuous way.

THE DESIGN

Looking to the future without neglecting the past.

Elentek combines his knowledge with the most recent discoveries and designs control panels of lastest generation constantly improving the performance of the systems where they are installed.

Never before has the control, management and protection of pumps become of the highest quality: the new Elentek control panels are easy to install, expandable, versatile, equipped with a multifunction display or led signals, and ensure anti-seize function.

RESEARCH

PROJECT

DESIGN

Experience added to modern technology

The App allows you to check the status of the electrical panel and inputs and to perform operations without having to open the device.

Every customer request has been received and designed.

THE TECHNICAL OFFICE

The technicians who design and test Elentek control panels are the ones who then follow the customer in after-sales support: an extra security for each installer who can contact the source, if the instruction manual is not enough.

Day after day, with continuous confrontation, knowledge grows and every need is reflected in a new product.

THE ADVANTAGES OF THE NEW ELENTEK PANELS

"One step forward" to satisfy every need.

The continuous study of the market, the direct confrontation with users and the will to satisfy every need at the source. Elentek has always designed its electric panels with the final application in mind, facilitating the installation and the following check.

The new panels designed and built entirely by Elentek have several advantages over the previous range:

Expandability

Elentek new boards can be expanded with multiple modules described in the catalogue or with a customized module for the need. These additional modules can be integrated into each panel.

Versatility

Higher powers and number of controllable electric pumps are now managed with more powerful control boards.

App

The management and programming of the control panel has become even more simple and intuitive for the installer and user with a new app.

Made in Italy

Production, assembly and testing are managed directly by Elentek to guarantee high quality standards from the first to the last chip.

Support

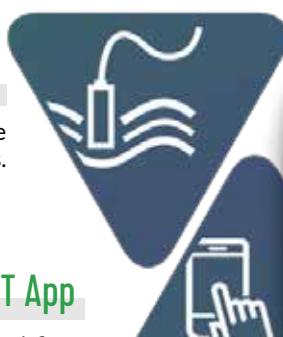

From the design to the instruction manual, Elentek facilitates use and clarifies any doubts.

THE ADDED VALUE OF OUR EXPANSIONS

The versatility of the new Elentek control panels becomes tangible with an expansion of the functions. The expansions that can be implemented within the panels actually allow to increase their versatility.

PRO-SL - Level probes module

This module is for using the (conductivity) level probes for the management of the control panel in place of float switches.

Bluetooth wi-fi module for PROXPS-WiFi/BT App

Allows you to connect the panel to any device via wi-fi or bluetooth to the unique Elentek APP

PRO-SL H2O - Water-in-oil-chamber module

It detects the presence of water in the oil chamber of the pump.

PROXPS RS485 - Modbus module

This RS485 module allows communication between different devices connected to the same network. Modbus is often used to connect a supervisor computer with a remote terminal unit (RTU) in supervisory control and data acquisition systems (eg. SCADA).

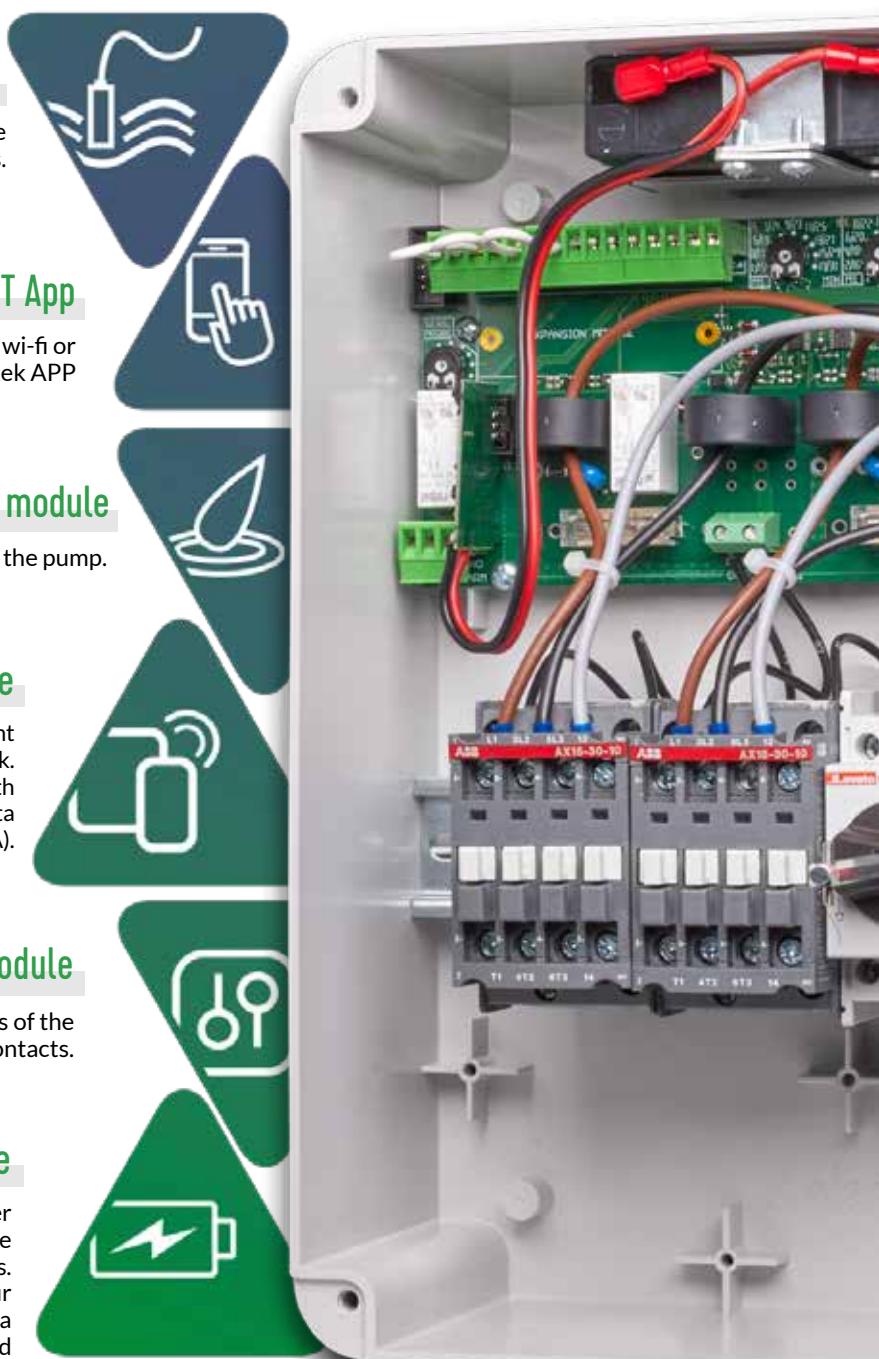

PROXPS-6DO - Free voltage contact BMS module

This module is used to remotely check the operating status of the system through ON-OFF free voltage contacts.

PRODBT - Buffer battery module

A kit made of a buffer battery and its support to power supply and signal the level alarm (GA contact) of the electrical panel even in power failure or blackout conditions.

With the appropriate kit you can implement this on your panel's functionality without having to add an extra alarm panel to your system or making an afterward implementation easier.

UNIQUE ELENTEK APP

With the unique Elentek APP you can control the status of the electrical panel and carry out operations **without having to open it**. Thanks to the fast configuration and the intuitive interface you can have your control panels always at hand!

Multilingual

Language set-up

Connectivity

Search for the panel to be connected via bluetooth.

Security

Personal password entry depending on the type of user.

Memorization

Memory and alarm history.

Personalization

Customize your control panel according to the type of pumping system.

Full Control

Visualization of the status of the board's inputs and outputs.

Turn your smartphone into the display of your
elentek control panel!

Electronic Panels

p. 10-13

smart PRO

PRESSURISATION - FILLING - EMPTYING - DRAINAGE

The panel that allows you to optimize at low cost.

p. 14-17

smart PRO X

PRESSURISATION - FILLING - EMPTYING - DRAINAGE

Smart Pro integrated with a practical display.

p. 18-23

express PRO

PRESSURISATION - FILLING - EMPTYING - DRAINAGE

The expression of completeness.

p. 24-27

drytek PRO

PRESSURISATION - FILLING

The panel for dry running without probes.

p. 28-31

easy

PRESSURISATION - FILLING

The easiest Elentek panel to use.

p. 32-35

pluvio PRO

EMPTYING - DRAINAGE

The electrical panel for systems first rests.

p. 36-39

wasteK PRO

EMPTYING - DRAINAGE

Ideal for installations in small well.

p. 40-43

starDelta PRO

PRESSURISATION - FILLING - EMPTYING - DRAINAGE

The powerful and reliable panel in all conditions.

p. 44-47

reacto PRO

PRESSURISATION - FILLING - EMPTYING - DRAINAGE

It combines completeness and versatility with the need for a submersible pump.

EXPANDABILITY

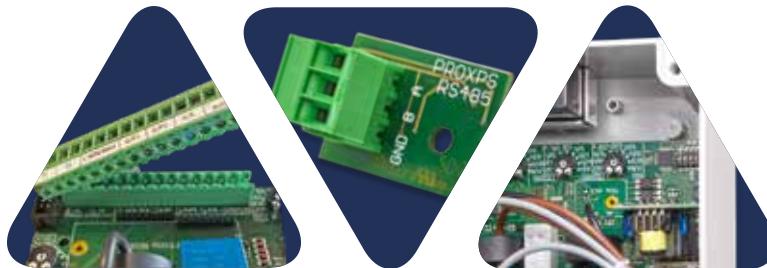

VERSATILITY

Want to optimize at **low cost?**
smart PRO

SMART PRO is the evolution of Elentek's best-seller control panel, suitable for both **clean water** and **wastewater systems**. Thanks to the new expansion modules system and the connections, the panel can be used for a wide range of applications and increases the potential of the system. Compact, very easy to install and program also by App, it facilitates the replacement of old and obsolete panels installed.

TECHNICAL FEATURES

FUNCTIONS

- LEDs on front of panel for signaling operating status and alarms
- AUTOMATIC - 0 (standby) - MANUAL pushbuttons (fixed or pulse)
- Anti-seize autotest (can be disabled)
- Dry running protection with: level probes/ floats/ pressure switches
- Up to 4 control inputs: floats/pressure switches
- Clicson inputs with automatic reset (can be disabled)
- Inversion of inputs (from normally open to normally closed)
- Start/stop float switch function (can be disabled)
- Current protection delay
- Automatic reset from minimum current alarm (can be disabled)
- Delay time of motor enabling after power mains return
- Pushbutton for manual operation (fixed or pulse)
- Predisposition for run capacitors for single-phase version (not included)

ADDITIONAL FUNCTIONS SMART PRO 2

- Duty/standby (can be disabled)
- Immediate motor changeover in case of a fault

VERSIONS

- Power supply 1phase 100-240Vac 50/60Hz
- Power supply 3phase 310-450Vac 50/60Hz

CONTROLS

- Electronic control of maximum current with assisted calibration
- Electronic control of minimum current (dry running) with assisted calibration
- Failure or incorrect phase sequence control on power supply input (can be disabled)

ALARMS

- Alarms reported: voltage status, levels, motor overload, minimum motor current, clicson motor
- General alarm output contacts

PROTECTIONS

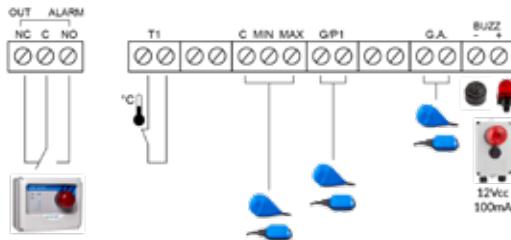

- Auxiliary and motor protection fuses
- Isolator (except for NB code)
- Box in ABS, IP55

TECHNICAL FEATURES

FUNCTIONS

- LCD display for displaying and programming: voltage, current, power factor, hours of operation, number of starts, motor status, alarms, analogue signal and thresholds
- AUTOMATIC - 0 (standby) - MANUAL (fixed or pulse) operation buttons
- Language settings (Italian, English, French, Spanish, German)
- Anti-seize autotest (programmable)
- Dry running protection with: level probes/ floats/ pressure switches and minimum current
- Up to 6 control inputs: floats/pressure switches
- Input for 4-20 mA or 0-10V analogue signal
- Unit of measurement analogue signal cm - m - bar
- Emergency start and stop inputs with analogue signal operation mode (can be disabled)
- Clickson thermal pad inputs with automatic reset (can be disabled)
- Inversion of inputs (from normally open to normally closed)
- Automatic reset for minimum current alarm with 4 programmable times
- Activation delay from mains return (can be disabled)
- Manual button operation (fixed or pulse)
- Predisposition for run capacitors for single-phase version (not included) (non inclusi)

EXPRESS PRO 2-3-4 ADDITIONAL FUNCTIONS

- Duty standby (can be disabled)
- Immediate motor changeover in the case of a fault

VERSIONS

- Single-phase version 100-240Vac 50/60Hz
- Three-phase version 310-450Vac 50/60Hz

CONTROLS

- Electronic control of minimum and maximum voltage
- Electronic control of maximum motor current
- Electronic control of minimum motor current
- Failure or incorrect phase sequence control on power supply input (can be disabled)

ALARMS

- Alarms reported: voltage status, levels, motor overload, minimum motor current, clicson motor
- Alarms history
- Alarms for too many starts/hour (programmable)
- General alarm output contacts

PROTECTIONS

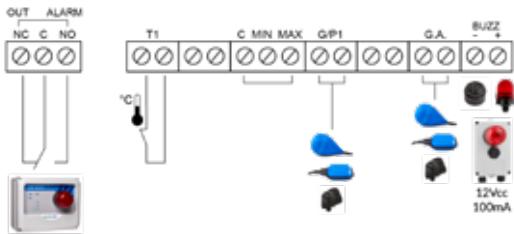

- Auxiliary and motor protection fuses
- Isolator (except for NB code)
- Box in ABS, IP55

Dry running protection without probes?

drytek

DRYTEK PRO protects the electric pump against dry running by the power factor control integrated in the microprocessor. Thanks to the display and the available expansions it helps **saving installation time** and reducing service costs.

UNIQUE APP

RS485
(Optional)

POWER FACTOR

POWER FACTOR CONTROL

Dry running protection without use of level probes

MULTIFUNCTION DISPLAY

Display and programming of parameters from multi-language LCD display

PROGRAMMABLE RESTARTS

Programmable restart times from dry running protection

Integrates accurate protection systems

APPLICATIONS

PRESSURISATION

FILLING

EMPTYING

DRAINAGE

CONNECTIVITY

BMS FREE VOLTAGE CONTACTS MODULE

BLUETOOTH WI-FI MODULE FOR APP

RS485 MODBUS MODULE

TECHNICAL FEATURES

FUNCTIONS

- LCD display showing: voltage, current, power factor, hours of operation, number of starts, motor status and alarms
- AUTOMATIC - 0 (standby) – MANUAL selector (fixed or pulse)
- Language settings (Italian, English, French, Spanish, German)
- Anti-seize autotest (programmable)
- Dry running protection by power factor control
- Up to 4 control inputs: level probes/floats/pressure switches
- Clicson inputs with automatic reset (can be disabled)
- Inputs inversion (from normally open to normally closed)
- Automatic reset for minimum power factor alarm settable with 4 times
- Manual button operation (fixed or pulse)
- Provision for run capacitors on single-phase model (not included)

VERSIONS

- Power supply 1phase 100-240Vac 50/60Hz
- Power supply 3phase 310-450Vac 50/60Hz

CONTROLS

- Electronic control of minimum and maximum voltage
- Electronic control of maximum motor current
- Dry running control by power factor
- Failure or incorrect phase sequence control on power supply input (can be disabled)

ALARMS

- Alarms reported: voltage status, levels, motor overload, minimum power factor, motor clicson
- Alarm output contacts

PROTECTIONS

- Auxiliary and motor protection fuses
- Isolator (except for NB code)
- Box in ABS, IP55

DRYTEK PRO 2 ADDITIONAL FUNCTIONS

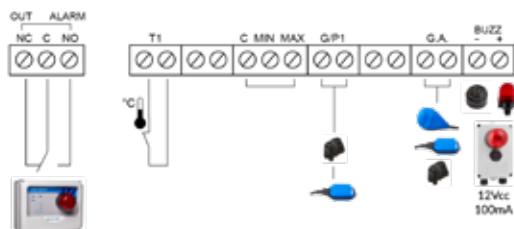

- Duty standby (can be disabled)
- Immediate motor changeover in case of fault

easy

EASY INSTALLATION

USER INTERFACE

EXPANDABILITY

VERSATILITY

Make it **easy?**
easy

EASY, the most user-friendly panel from Elentek.
Easy control panel is self-programming by simply pressing a button.
EASY creates a local wireless network to control and refine the parameters with your **smartphone or tablet**.
Control and protect, just do it simply with EASY.

ESSENTIAL

Self-learning means no set-up required

COMPACT

Small size for specific needs

CONNECTIVITY

Private Wi-Fi to connect to your device

PLUG-IN VERSION

Simplifies installation even further

APPLICATIONS

PRESSURISATION

FILLING

EMPTYING

DRAINAGE

CONNECTIVITY

BUILT-IN WI-FI MODULE FOR APP/BROWSER

POWER SUPPLY PLUG

Plug for power supply of the motor and 2 control input connectors (EASY PLUG IN single phase version only)

TECHNICAL FEATURES

SELF-LEARNING FUNCTIONS

- LEDs on front of panel for signalling operating status and alarms
- Pushbuttons: AUTOMATIC, 0 with MANUAL function
- Self-learning of electrical motor data
- Dry running protection by: level probes/floats/pressure switches
- Up to 2 control inputs: level probes/floats/pressure switches
- Manual button operation (fixed or momentary)
- Predisposition for run capacitors for single-phase version (not included)

VERSIONS

- Power supply 1 phase 100-240Vac 50/60Hz (EASY-Mono)
- Power supply 3 phase 310-450Vac 50/60Hz (EASY-Tri/5.5)

CONTROLS

- Electronic control of maximum current
- Electronic control of minimum current (dry running)
- Failure or incorrect phase sequence control on power supply input

ADDITIONAL FUNCTIONS WITH WI-FI CONNECTION

- Interface language selection: Italian/English/French/German/Spanish
- Display of motor absorption, working hours and number of motor starts (resettable)
- Electronic control of minimum current (dry running)
- Automatic reset due to minimum current alarm with programmable times
- Selection of delay time for minimum/maximum current alarm activation at motor start
- Too many starts/hour setting and alarm
- Enabling of level alarm from probes

ALARMS

- Alarms reported: voltage status, levels, motor overload, minimum motor current and high board temperature
- General alarm output contacts

PROTECTIONS

- Auxiliary and motor protection fuses
- Box ABS, IP55

EASY PLUG IN VERSION

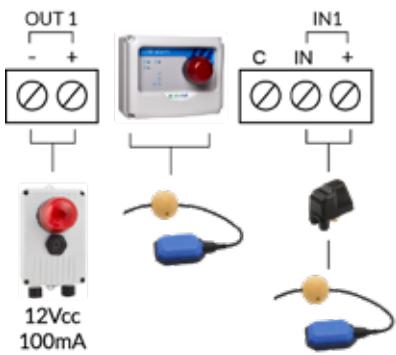

- Complete with: mains power plug, motor power socket and 2 control connectors (e.g. floats, pressure switch and/or probes)

easy PLUG IN

The **EASY** electrical panel is also proposed in the version **PLUG IN**, to offer an even more equipped and ready-to-install solution.
EASY PLUG IN comes complete with: mains power plug, motor power socket and 2 control connectors (e.g. floats, pressure switch and/or probes)

pluvio PRO

EASY INSTALLATION

USER INTERFACE

EXPANDABILITY

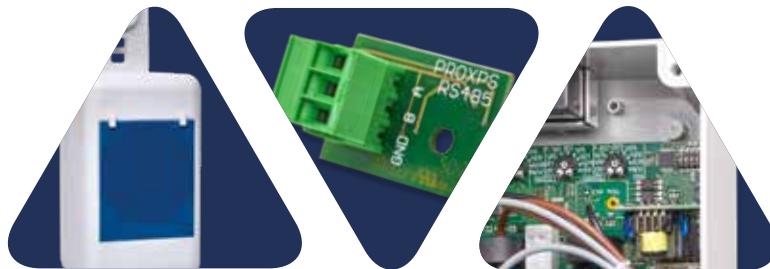

VERSATILITY

Do you want to start the emptying pump at the **right time?** **pluvio**

PLUVIO guarantees the emptying of the rainwater first flush tank. This is the electronic panel by Elentek specific for this type of system. At the end of the meteorological event, the **rain sensor** connected to the panel will start the emptying pump at the end of the preset time.

Compact, economical, very easy to install and program, PLUVIO facilitates the replacement of old panels installed.

RAIN SENSOR

RS485
(Optional)

MODULAR
EXPANDABILITY

SPECIFIC

The specific control panel for rainwater first flush systems

INTUITIVE

Maximum simplicity of setting and use

COMPLETE

Supplied with rain sensor

MAXIMUM CONTROL

Integrates the most comprehensive system protections

APPLICATIONS

PRESSURISATION

FILLING

EMPTYING

DRAINAGE

CONNECTIVITY

BMS FREE VOLTAGE CONTACTS MODULE

BLUETOOTH WI-FI MODULE FOR APP

RS485 MODBUS MODULE

TECHNICAL FEATURES

FUNCTIONS

- LEDs on front of panel for signalling operating status and alarms
- AUTOMATIC - 0 (standby) - MANUAL selector (fixed or pulse)
- PLUVIO PRO 2 motor alternation (can be disabled)
- Immediate engine exchange in case of PLUVIO PRO 2 anomaly
- Dry running protection with: level probes/ float switch
- Up to 4 control inputs: floats/pressure switches
- Clicson thermal pad inputs with automatic reset (can be disabled)
- Current protection delay
- Automatic reset due to minimum current alarm (can be disabled)
- Activation delay from mains return (can be disabled)
- Manual button operation (fixed or momentary)
- Provision for run capacitors for single-phase version (not included)
- Delay timer for pump start at the end of the rain event (settable)
- Rain sensor

ADDITIONAL FUNCTIONS PLUVIO PRO 2

- Duty standby (excludable)
- Immediate motor changeover in case of a fault

VERSIONS

- Power supply 1phase 100-240Vac 50/60Hz
- Power supply 3phase 310-450Vac 50/60Hz

CONTROLS

- Electronic control of maximum current
- Electronic control of minimum current (dry running)
- Failure or incorrect phase sequence control on power supply input (can be disabled)

ALARMS

- Alarms reported: voltage status, levels, motor overload, minimum motor current, clicson motor
- General alarm output contacts

PROTECTIONS

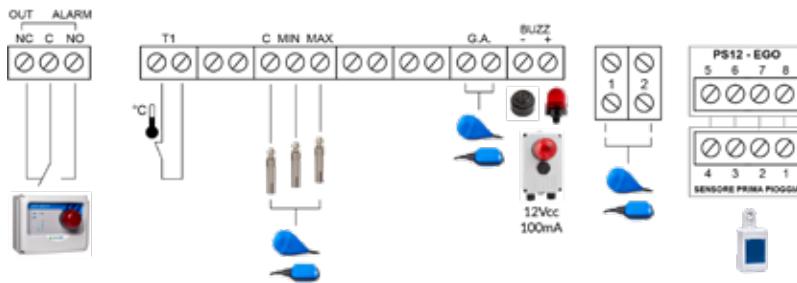

- Auxiliary and motor protection fuses
- Isolator (except for NB code)
- Box in ABS, IP55

TECHNICAL FEATURES

FUNCTIONS

- LCD display for displaying and programming: voltage, current, power factor, hours of operation, number of starts, motor status, alarms, sensor signal and thresholds
- AUTOMATIC - 0 (standby) – MANUAL pushbuttons (fixed or pulse)
- Language settings (Italian, English, French, Spanish, German)
- Dry running protection by: level probes/floats/pressure switches and minimum current
- Up to 4 control inputs: floats/pressure switches
- Input for air sensor and 4-20 mA or 0-10V analogue signal
- Unit of measurement of analog signal: centimetres or metres
- Clicson inputs with automatic reset (can be disabled)
- Inputs inversion (from normally open to normally closed)
- Automatic reset from minimum current alarm settable with 4 programmable times
- Start-up and shutdown delay time (programmable)
- Maintenance time control (programmable)
- Pushbutton for manual operation (fixed or pulse)
- Provision for run capacitors on single-phase model (not included)

VERSIONS

- Power supply 1phase 100-240Vac 50/60Hz
- Power supply 3phase 310-450Vac 50/60Hz

CONTROLS

- Electronic control of minimum and maximum voltage
- Electronic control of maximum motor current
- Electronic minimum motor current control
- Failure or incorrect phase sequence control on power supply input (can be disabled)

ALARMS

- Alarms reported: voltage status, levels, motor overload, minimum current, clicson motor
- System maintenance warning
- Alarm output contacts

PROTECTIONS

- Auxiliary and motor protection fuses
- Isolator (except for NB code)
- Box in ABS, IP55

ADDITIONAL FUNCTIONS WASTEK PRO 2

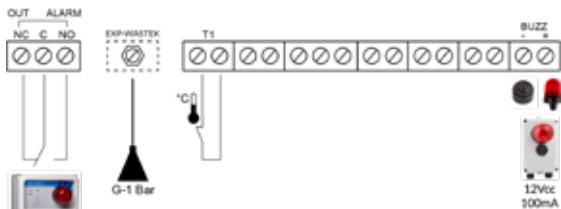

- Duty/standby (can be disabled)
- Immediate motor changeover in case of a fault

TECHNICAL FEATURES

FUNCTIONS

- LCD display for displaying and programming: voltage, current, cos-phi, hours of operation, number of starts, motor status, alarms, analogue signal and thresholds
- Selector AUTOMATIC - 0 (standby) - MANUAL operation
- Language settings (Italian, English, French, Spanish, German)
- Anti-seize autotest (programmable)
- Dry running protection with: level probes/ floats/ pressure switches and minimum current
- Up to 2 control inputs: float/pressure switches
- Input for 4-20 mA or 0-10V analogue signal
- Unit of measurement analogue signal cm - m - bar
- Emergency start and stop inputs with analogue signal operation mode (can be disabled)
- Clicson thermal pad inputs with automatic reset (can be disabled)
- Inversion of inputs (from normally open to normally closed)
- Automatic reset due to minimum current alarm with 4 programmable times
- Activation delay from mains return (can be disabled)
- Manual button operation (fixed or pulse)
- Settable impedance timer

VERSIONS

- Power supply 3phase 310-450Vac 50/60Hz

CONTROLS

- Electronic minimum and maximum voltage control
- Electronic control of maximum motor current
- Minimum motor current control
- Failure or incorrect phase sequence control on power supply input (can be disabled)

ALARMS

- Alarms reported: voltage status, levels, motor overload, minimum current, motor clicson
- Alarm history
- Starts / hour alarm (settable)
- Alarm output contacts

PROTECTIONS

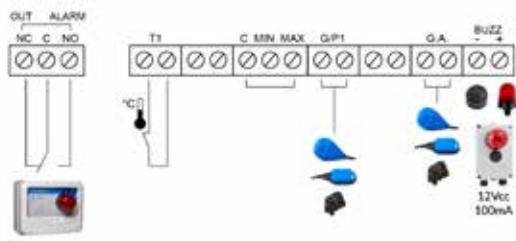

- Auxiliary and motor protection fuses
- Isolator (except for NB code)
- Metallic box, IP55

DROP FLOATS

DROP is a special level regulator, suitable for both industrial and civil use, designed to optimise the level control of **sewage and waste water**. Built with three watertight chambers with trim variation, unlike traditional float switches that remain on the surface of the water, Drop, thanks to its special construction with **integrated counterweight**, remains underwater.

FILLING

EMPTYING

TECHNICAL FEATURES

- **Float switch**
- **Cable type:** 05VV-F 3x1 mm²
- **Operating voltage:** 230V/50 Hz
- **Nominal voltage:** 250 V
- **Switching current (Max):** 10(8) A
- **Cable connection** with terminals without connectors
- **Temperature (Min):** 0 °C
- **Temperature (Max):** 50 °C
- **Degree of protection:** IP68
- **Contact type:** 1 changeover
- **Material:** plastic
- **Cavo:** neoprene, IMQ certified

Code	Model	Cable	Length (M)	Weight (Kg)
99036	DROP 10	Neoprene	10	2
99037	DROP 20	Neoprene	20	3
99038	DROP EX	Explosionproof	10	2,5

1. First watertight chamber

2. Second watertight chamber

3. Third watertight chamber

4. Spherical plastic seal:

it augments the structural resistance of the float and weighs on the expanded polystyrene crown cap beneath creating the third watertight chamber

5. Final thermoplastic sealing:

it fuses the various plastic parts together into one single piece

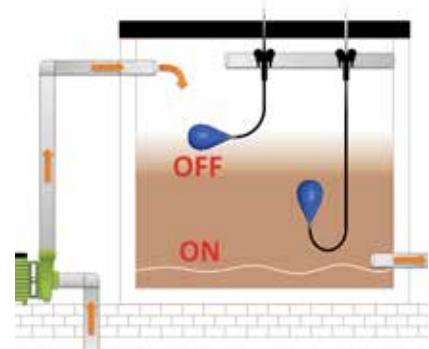

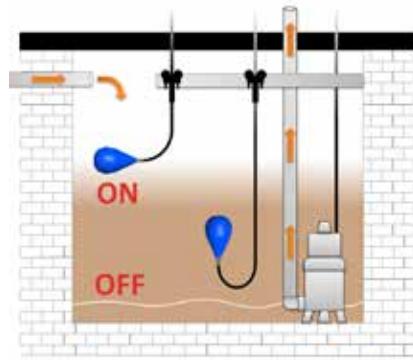

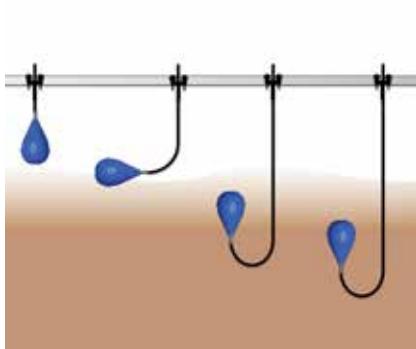

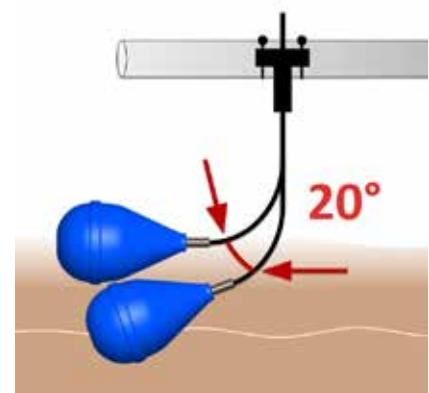

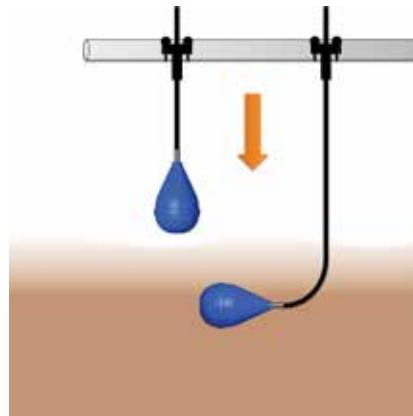

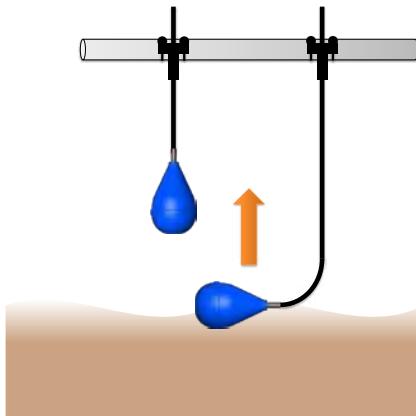

6. Expanded polystyrene

crown cap: it compresses the metallic grit

7. Metallic grit

8. Cable gland

9. Rubber grommet: tested at 5 bar

FLO FLOATS

FLO is a special level regulator, suitable for both industrial and civil use, designed to regulate the level control of **clear water**. The Flo float switch has various applications, such as filling or emptying tanks, pump actuation, minimum level control and much more.

 **FILLING**

 **EMPTYING**

TECHNICAL FEATURES

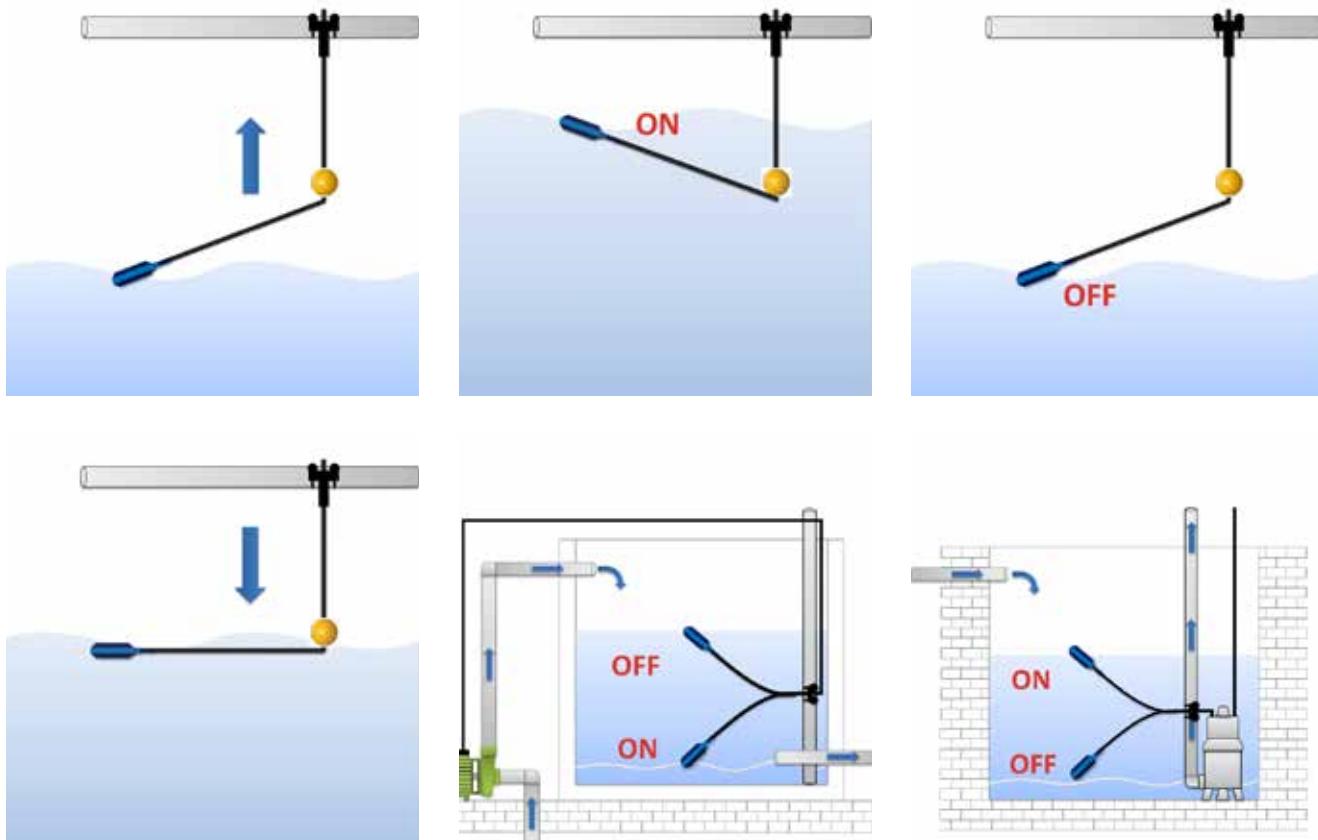

- **Float switch**
- **Functions:** Filling/emptying
- **Operating voltage:** 230V/50 Hz
- **Rated voltage:** 250 V
- **Switching current (Max):** 10(8) A
- **Cable connection** with terminals without connectors
- **Temperature (Min):** 0 °C
- **Temperature (Max):** 50 °C
- **Degree of protection:** IP68
- **Contact type:** 1 changeover
- **Material:** plastic
- **Cable:** neoprene, IMQ certified

Code	Model	Cable	Length (M)	Weight (Kg)
99033	FLO 5	Neoprene	5	0,6
99034	FLO 10	Neoprene	10	1
99035	FLO 20	Neoprene	20	2
99039	SHELL	X	X	0,2

Counterweight SHELL

Material: Polipropene
Weight: 230g

Allows the float switch to always operate with the same cable length, even in turbulent water, preventing damage to the cable.

BALL VALVES

Threaded ball valves made of cast iron. They are extremely reliable mounted either vertically or horizontally, preventing the return of liquid e.g. into a sump in applications with submersible drainage pumps.

TECHNICAL FEATURES

- **Valve body:** Cast iron GG 25
- **Valve cover:** Cast iron GG 25
- **Ball:** NBR
- **O-Ring body:** NBR
- **O-Ring cover:** NBR
- **Screws:** acciaio inox
- **Maximum operating pressure:** 10 bar
- **Liquid temperature:** -10/+80 °C

Code	Model	DN	PN	H	Weight (Kg)
99110	PAL 125	1" ¼	10	133	2,1
99111	PAL 150	1" ½	10	150	2,3
99112	PAL 200	2"	10	175	3,1
99113	PAL 250	2" ½	10	205	6,7

PRESSURE TRANSDUCER

Pressure transducers convert pressure into an analogue electrical signal (4-20mA) and are used to easily and quickly **measure pressure** to control industrial processes.

They allow **differential pressure**, i.e. the difference between relative and absolute pressure, to be checked.

TECHNICAL FEATURES

- **Standard pressure connection:** ISO
- **Ambient temperature range (Max):** 85 °C
- **Ambient temperature range (Min):** -40 °C
- **Fluid temperature range (Max):** 80 °C
- **Fluid temperature range (Min):** -20 °C
- **Standard electrical connection:** IEC60947-5-2 (1997)
- **Pressure connection size:** G 1/4 A
- **Protection class IP:** IP67
- **Output signal (mA) (Max):** 20 mA
- **Output signal (mA) (Min):** 4 mA
- **HEX pressure connection:** 27mm
- **Electrical connector:** M12 x 1
- **Enclosure material:** 304L
- **Wetted part material:** 304L/316L

Code	Model	Min Pressure range (bar)	Max Pressure range (bar)	Weight (Kg)
98044	TP010B	0	10	0,1
98045	TP016B	0	16	0,1

E-KIOSK

Polyethylene columns for protecting Elentek control panels.

Adverse weather conditions such as wind, rain and beating sun can reduce the reliability, durability and performance of the control panels, which is why Elentek designed E-kiosk.

Ideal for outdoor use, the polyethylene columns protect the control panels from dust, dirt and water and ensure the safety of the equipment.

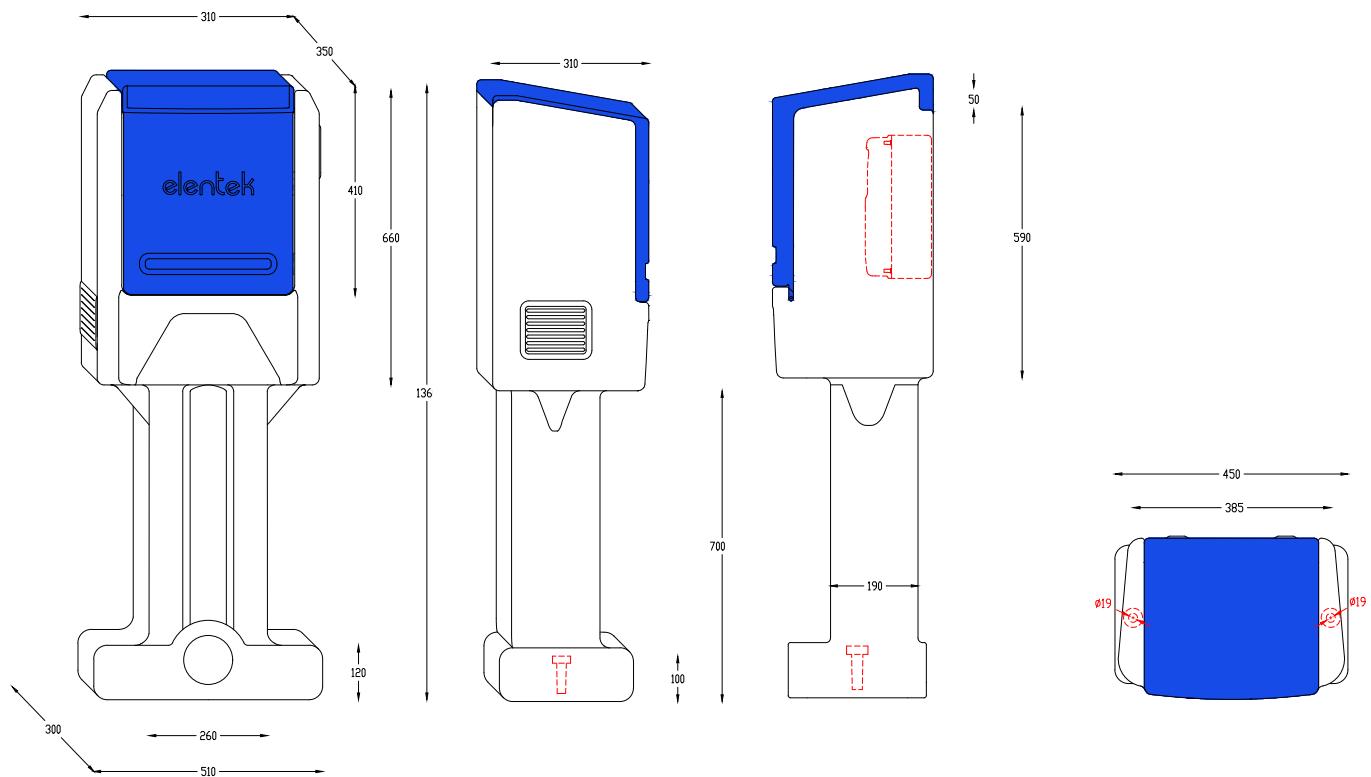

TECHNICAL FEATURES

- **Material:** monobloc polyethylene with rotational moulding
- **High impact resistance,** solar radiation and inclement weather
- **Ideal for humid and cold climates,** as they are durable against corrosion (unlike metal or steel enclosures)
- **Total dimensions:** 510x300xh1360 mm
- **Control panel housing dimensions:** 300x250xh500 mm

Code	Model	H (mm)	L (mm)	W (mm)	Weight (Kg)
97007	E-KIOSK	1360	510	300	13

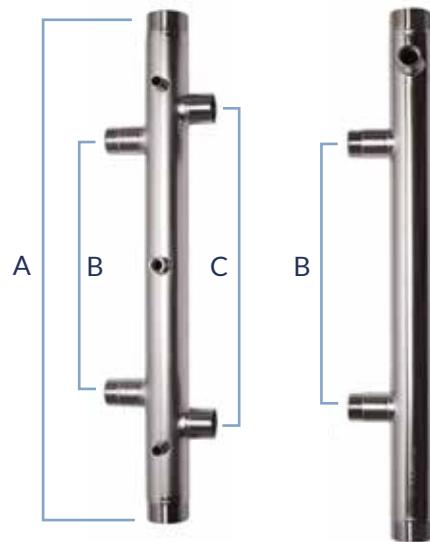

DIMENSIONS

STAINLESS STEEL MANIFOLDS

Stainless steel manifolds for connecting **two electric pumps** in order to obtain a higher water flow rate. Thanks to the thin thickness and TIG welding of the threaded parts, pressure losses are reduced to a minimum.

Ideal for application in two-pump **booster kits together** with our support base complete with control panel rod.

TECHNICAL FEATURES

- **Material:** stainless steel AISI 304 (316 on request)
- **Nominal working pressure:** 16 bar
- **Threaded connections:** Gas cylindrical UNI ISO 228/1
- **Welding:** TIG with or without filler material
- **Plastic deformation:** cold, for better surface finish
- **Surface treatment:**
 - » **degreasing**
 - » **pickling:** indicated on those articles where there are welds that reduce the stainlessness of the material and its resistance to corrosion.
 - » **electropolishing:** removal process involving a controlled removal of the metal from its surface

STAINLESS STEEL DELIVERY MANIFOLDS

Code	Model	DNM	DNP	A	B	C	Weight (Kg)
99020	INOX.MAN 150/100	1" ½	1"	600	300	370	2,4

99026	INOX.ASP 300/200	3"	2"	700	360	-	5,5

PRESSURE SWITCHES

Pressure switches for water installations

TECHNICAL FEATURES

- **Nominal pressure** adjusting screw
- **Differential pressure** adjustment screw
- **Normally closed electrical contacts** made of brass alloy with Ag-Ni coating
- **Membrane:** white NBR with PA (nylon) insert
- **Hydraulic connection:** ¼" F galvanized steel
- **Strain relief** cable glands
- **Terminal box** with non-accessible electrical contacts

Code	Model	Setting Range	Standard calibration	Min differential	Nominal current
99050	PM/5	1 - 5 bar	1,4-2,8 bar	0,6 bar	16 A
99051	PM/12	3 - 12 bar	5-7 bar	1,5 bar	16 A

BASES FOR BOOSTER SETS

Base and column in matt grey pickled sheet metal with a thickness of 3 mm.
What makes it particularly suitable for various applications is the favourable mix of its specific characteristics; in particular, it is appreciated for its high hardness and mechanical properties.
After pickling, the surface of the metal is cleaned of oxide residues and by calamine, or lamination flake. Once the processing is complete, the base is coated with a special colouring powder composed of synthetic resin and subjected to polymerisation: the powder melts and is thus evenly distributed on the sheet, giving it the colour of your choice.

TECHNICAL FEATURES

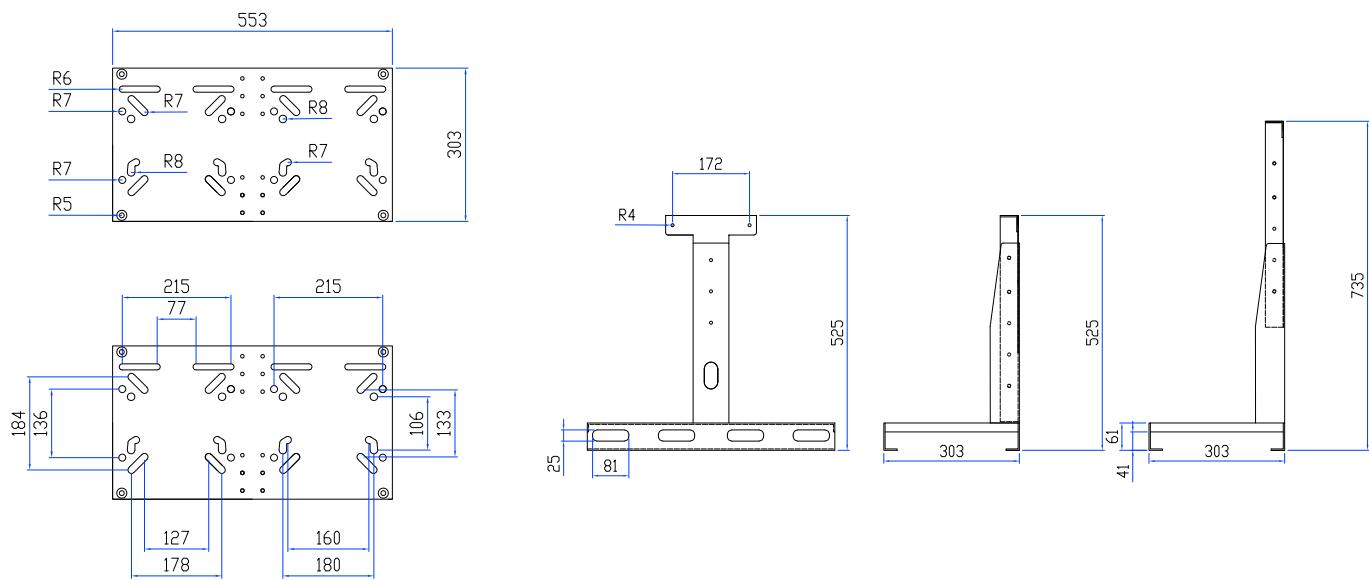

- **Material:** epoxy powder-coated steel
- **Weight:** 7,00 Kg
- **Dimensions:** 553x303x525(min)-735(max) mm

Code	Model	H (mm)	L (mm)	W (mm)	Weight (Kg)
99009	BASE FULL	525-735	553	303	7

DIMENSIONS

UNIT ALARM

UNIT ALARM is a device applicable to any system where it is necessary to have alarm signals even in the absence of mains power. It is available in the version with an acoustic alarm (mod. UNIT ALARM 1), with an acoustic and visual flashing alarm (Unit Alarm 2) and in the version with acoustic, visual and GSM signalling (Unit Alarm GSM), i.e. supplied with a kit that includes an antenna and programmable transmitter for signalling alarm activation to mobile phones.

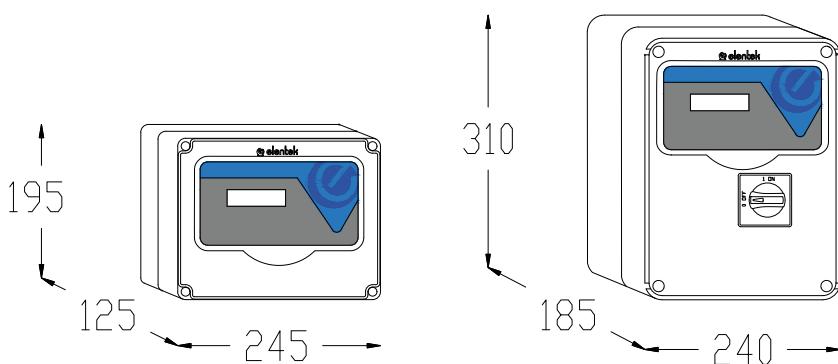

TECHNICAL FEATURES

- **Version:** Single-phase 210-250Vac 50/60Hz version
- **Alarm status control**
- **LEDs on front panel** for signalling operating status and alarms
- **function buttons:** TEST - REST - TACTIVATION
- **Up to 2 control inputs:** floats/pressure switches
- **Reports:** acoustic (90dB) - flash (Led) - **GSM signalling** (sim not included)
- **Automatic alarm reset setting** (can be excluded)
- **Alarm deactivation delay timer** (programmable)
- **Signalled alarms:** voltage status and input status
- **General alarm** output contacts
- **24-hour autonomy** in the event of power failure
- **Protection** fuses
- **Box Material:** ABS, IP54

Code	Model	Flashing	Sound press. (dB)	Voltage (Vdc)	Autonomy (h)	Box	Material	Weight (Kg)
